Ali Bin Saeed

Software Engineer in Test | React.js | PHP | WordPress | CRM Customization | Exploring Gen AI & Project Management
Rahim Yar Khan District, Punjab, Pakistan

Summary

A Software Engineer, currently in Software Testing, skilled in React.js, PHP, and WordPress, with experience in building responsive web applications and customizing CRM systems like SugarCRM and SuiteCRM. Passionate about ensuring product quality, optimizing performance, and solving technical challenges through a blend of development and testing expertise.

Previously involved in frontend and backend development, I now focus on testing and quality assurance, ensuring that every feature delivers the best possible user experience. Experienced with tools like Trello, Postman, and Git for tracking, collaboration, and testing workflows.

Eager to expand expertise into Cloud Computing, Generative Artificial Intelligence (Gen AI), and Project Management to contribute to building scalable, intelligent, and well-managed digital solutions.

Let's connect and explore opportunities to collaborate on impactful projects!

Experience

Smart Techlodge

July 2021 - December 2021 (6 months)
Lahore, Punjab, Pakistan

Campaign Name: Breathe Green (US Inbound):

In this campaign, there are different electronics products which we sell like USB Chargers, wireless chargers, humidifiers, air purifiers, Wi-Fi repeaters, bug zappers, heaters, air coolers, diffusers, neck massagers, teeth whitening tray, air pumps, flash lights.

Customers Call for the Following:

Shipping status: We track the package on the tracking sites and inform the customer when their package will arrive. If due to any reason, customer didn't receive the package whether the package lost or RTS. We processed a reship order.

How to returning the product: We're authorize to offer the customer different discounts depending on the situation and reason of cancelling or returning the package. If the customer accepts our discount offers, then we process the refund. Otherwise, we cancel the order or guide the customer how to return the product.

Refund: We process the refund after verifying whether the customer returned the product or not.

Product details, charge details, order details: We provide the product, charge, and order details to the customer.

Address or Email Updating: We update the customer's shipping address or email address as per the customer request in file.

Order Placing Request: We place the order on customer's request.

WebBuggs

Wordpress Developer

September 2020 - February 2021 (6 months)

Lahore, Punjab, Pakistan

Worked with the WordPress development team on frontend development and designing.

What I have experienced during this internship :

- Designing and managing the website front-end.
- Maintain CSS consistency in design colors and themes across all platforms and browsers.
- Convert visual designs into working WordPress website from scratch including:
 - PSD to WordPress
 - AI to WordPress
 - XD/Figma to WordPress
